PROFESSIONAL SUMMARY

I am an *MBA-educated* and *Microsoft Certified: Power BI Data Analyst Associate* (*PL-300*) with proven data-driven experience in the telecommunications industry. Currently, I serve as a Trust & Safety Associate at Accenture, contributing to platform integrity and content policy enforcement. I have a proven track record of translating complex telecom network data, KPIs, and operational metrics into clean, actionable dashboards and strategic insights for senior management.

DIPLOMA AND CERTIFICATES

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** *Credential ID: 2E633A85669F5356*
- **Microsoft Excel - Excel from Beginner to Advanced (Macro/VBA)**
- **Data Analysis with Python** | *Credential ID: EYX5RGZIO7B4*
- **Databases and SQL for Data Science with Python** | *Credential ID: XJ6GTXY58ONQ*

TECHNICAL SKILLS

- **Data Analysis & Programming**: Python (NumPy, Pandas, Matplotlib), SQL (MySQL, SQLite), RDBMS.
- **Data Visualization & BI Tools**: Power BI (Desktop, Cloud, Power Query, DAX), Advanced Excel (Dashboards, Pivot Tables, VBA/Macros).
- **Core Competencies**: KPI Monitoring, Root Cause Analysis, Statistical Data Analysis, R Programming with Statistic (R Studio), Data Wrangling, Data Migration, Vendor Management, SLA Compliance.

EDUCATIONS

- **MBA (Online)** | *Yangon University of Economics, Myanmar* (GPA: 4.17), Awaiting Graduation
- **B.Sc. (Physics)** | *Mandalay University of Distance Education*
- **AGTI (Electronics)** | *Technological University of Meiktila*

WORK EXPERIENCES

Trust and Safety Associate | *Accenture Malaysia SDN BHD | Kuala Lumpur, Malaysia*
Aug 2025 – Present

- **Data-Driven Quality Assurance**: Leverage analytical skills to review high-volume platform content and user data, ensuring strict compliance with client content policies and community guidelines.
- **KPI & SLA Management**: Consistently meet and exceed daily productivity AHT (Average Handling Time), accuracy, and operational Service Level Agreement (SLA) targets
- **Root Cause Analysis**: Identify emerging trends, platform vulnerabilities, and malicious patterns from content data, providing insights to cross-functional teams to improve policy enforcement.
- **Reporting & Communication**: Deliver clean operational insights and performance reports to team leads, contributing to process optimization and platform integrity improvements.

Network Performance Optimization Engineer | *ZTE Corporation | Ooredoo MS Project*
Feb 2020 – Jun 2024

- **KPI & Root Cause Analysis**: Analyzed weekly network KPIs and performed deep-dive root cause analysis on service-impacting issues to optimize reliability.
- **Predictive Data Modeling**: Conducted Advanced Case Data Analysis and trend predictions for network solutions ahead of major public ceremonies and events.
- **BI Dashboard Engineering**: Built and maintained interactive Power BI dashboards (Power Query, DAX) and Excel for daily network performance monitoring, and utilized Python (NumPy, Pandas, Matplotlib).
- **Executive Reporting**: Presented weekly KPI performance dashboards to the Regional Business Head and senior leadership to drive cross-functional SLA compliance.
- **Business Support**: Provided direct data and technical support to high-priority B2B and VIP clients to maintain premium service quality.

Project Engineer / RAN Engineer | *Fortune Broadband Co., Ltd | LTE TDD Project*
Nov 2018 – Jan 2020

- Monitored Telecom installations and handled quality, reliability, and subcontractor SLA requirements.
- Scheduled operational activities, baseline plans, project timelines, and organized on-site teams.
- Planned site simulations using Atoll and drove test operations using TEMS tools.

Wireless Network Engineer | *Kinetic Myanmar Co., Ltd*
Aug 2015 – Jan 2018

- Acted as Team Lead of the Ooredoo DIA Wireless Project for site hunting, network planning, and surveys.
- Monitored backhaul networks and KPIs, and supervised engineers for customer complaint resolutions.

Technical Engineer (Customer Service Department) | *REDLINK COMMUNICATION Co., Ltd*
July 2014 – Aug 2015

- Troubleshot Wi-Max device errors, configurations, and optimized wireless network setups.
- Handled technical complaints from the call center and collaborated with cross-functional teams.
